

## Features

- German Engineering. Reliable operation. Motor with electronic control for soft start, constant speed, 3-4 second brake, and overload protection shown with light emitting diode (LED)
- Handle position and large base assures solid tracking on start of planing and leaving your work piece
- Two-knife drum, reversible one-way blades, no adjustment required. Tri-metal with cobalt/molybdenum for long life, yet lower cost. Our knives are quadruple cross-ground and polished. Provides sharper edge, longer up-time, increases quality of planed wood and exits shavings more efficiently from the machine
- Robust, vibration free aluminum housing provides proper weight/cut ratio
- Full use of designated width through integrated, but retractable fence tracking roll
- Depth of cut adjustment in front on clearly marked scale. Can be adjusted during planing action
- V-groove in center of base for easy bevel operation

### Model ZBH 20

- Planing width: 205 mm (8 1/16")
- Max depth of cut: 3 mm, recommended: 2 mm
- Power: 2000 Watt at 230 Volt
- No-load speed: 13500 rpm
- Cutting speed under power: 28 m/sec
- Weight: 13.0 kg

### Model ZBH 30

- Weight balanced for easy handling
- Reduced noise through new poly-V-belt, considerably longer belt life.
- Shavings exit to side of workpiece
- Planing width: 300 mm (11.81")
- Max depth of cut: 3.5 mm, recommended: 2.5 mm
- Power: 2100 Watt at 230 Volt
- no-load speed: 10300 rpm
- Cutting speed under power: 28 m/sec
- Weight: 15.8 kg

### Model ZBH 35

- Solid performer. Enormous power. Super wide. Features are the same as ZBH 30, but has heavier duty motor
- Planing width 350 mm (13 3/4")
- Max depth of cut: 2.5 mm, recommended: 2.0 mm
- Power: 2500 Watt at 230 Volt
- no-load speed: 12000 rpm
- Cutting speed under power: 28 m/sec
- Weight 18 kg
